

**NEW—MDLIVE Telemedicine!**

## Activate Now—Be Ready When You Aren't Feeling Well

Activate your MDLIVE telemedicine account now—then use this new service whenever you need non-emergency medical guidance but can't see your own doctor or other primary care provider. HealthFlex now offers MDLIVE, with 24/7 access to board-certified physicians via phone, secure video or mobile app—convenient for medical needs after normal office hours. MDLIVE doctors can diagnose non-emergency issues and prescribe medications.\*

You must set up an MDLIVE account\*\* to use the service.

\* Some state laws require that telemedicine doctors only prescribe medication in certain situations and subject to certain limitations.

\*\* Participant, spouse and adult dependents must activate separate MDLIVE accounts; children under 18 can be added to the primary participant's account or registered separately.

**Disclaimer:** This document is provided as a general informational and educational service to HealthFlex participants. It does not constitute medical, legal or consumer advice. Wespeth Benefits and Investments expressly disclaims all liability in respect to actions taken or not taken based on the contents of this document.

MDLIVE is easy to activate—do it now so you're ready later when you aren't feeling well. Three options:
