## Meet Your Money Match

Start the new year off right by earning **extra savings** for your future. When you contribute **at least 1%** of your pay to your retirement account\*, you earn the **full 1% match**—**doubling** those retirement savings.

### How Much Do I Have to Contribute?

If your pay is equal to the denominational average compensation of **\$72,648**, you'd have to contribute about **\$60 a month** to earn your full match. That's only **\$2 a day**.

You might have to trade your daily candy bar or cup of coffee, but the true cost is what you'd be missing if you don't—**more than \$1,400** in retirement savings this year PLUS potential investment earnings.

### What Should I Do Now?

If you aren't maximizing your match already, don't miss out! Submit a **Contribution Election** form to your church or conference, electing a contribution of at least 1% of your plan compensation (includes parsonage/housing allowance and moving expense payments).

Then watch your retirement savings grow from the money you save *and the extra money you'll earn*.
