A new website will make it easier to access your Wespath health and well-being benefits.

With Annual Election behind us, Wespath is looking forward to continuing to serve your health care needs in 2021. With a new website coming in December, you will be able to view and access all your HealthFlex benefits and well-being programs from one website.

The new Benefits Access website will include in one place your HealthFlex plan details, health account contributions and direct access to medical, dental and vision providers.

Well-being

Your HealthFlex plan offers comprehensive well-being programs to keep you balanced in all five dimensions of well-being. Need to access Virgin Pulse or check your PulseCash balance? Do you want information about health coaching or need to access the Employee Assistance Program (EAP)? You'll soon be able to access your HealthFlex well-being programs together with your health plan information in the new Benefits Access.

AND THERE'S MORE!

With the new Benefits Access, you will not be required to log in separately when accessing the following provider websites: BlueCross BlueShield, UnitedHealthcare, OptumRx, Health Equity, Quest and Virgin Pulse—as long as you have already established a login account for these sites.

Stay tuned for information about how to access the new Benefits Access website in December.

CLICK HERE to visit our dedicated webpage for more information, including FAQs and previews of the new site.
